WORLD LEADERS IN RADIANT HEATING

Tansun Spectrum – Lay Down

Tansun Sunbeds have launched the newest addition to the commercial sunbeds range. The Tansun Spectrum sunbed has been designed with user's needs and convenience in mind. It combines premium quality, unparalleled tanning performance, distinctive design and unique features in one unit. Your clients just need to lie down, relax and enjoy an even, all-over tanning.

Tansun Spectrum's 40 long life tanning lamps guarantee fast 360° tanning results from the first tanning session. It is a spacious unit for your client's comfort. It boasts decorative LED mood Lighting to complement any salon design and the mood of the salon. Stereo Speakers are also fitted as standard to enable people to listen to their favourite music while tanning.

Sunbed Available in Single or Three Phase Supply.

TANSUN LED SYMPHONY

The new stylish Tansun LED Symphony is here to surpass your customers' expectations and upgrade your sunbed business. It is a spacious and hygienic tanning unit that combines advanced technology and exceptional performance in one single unit. Tansun LED Symphony's 48 long life sunbed tubes offer fast 360° tanning results from the first tanning session. Its dual airflow system ensures the lamps' maximum tanning output and a cool and intelligent airflow for a pleasant tanning session.

The Tansun LED Symphony boasts modern and sleek design to fit into any application and decor. Featuring a digital hour counter, it indicates the total time that the sunbed has been in operation, but also the remaining time for a tanning session. An illuminated exit sign and an emergency stop button are included for safety reasons, while ergonomically designed handles add extra comfort. Stereo Speakers enable people to listen to their favourite music and make the tanning session enjoyable and relaxing.

TANSUN VITESSE INFRA TAN

Tansun's extensive research on new technologies and innovations resulted in a dual technology sunbed which has been designed to combine UV radiation for unsurpassed tanning results with infrared light for health and rejuvenating purposes. The Tansun Vitesse Infra Tan sunbed offers a full body treatment.

Research shows that infrared light can be used for many therapeutic applications due to the fact that the heat radiation speeds and improves many normal bodily processes and boosts tanning results. In particular, infrared expands the blood vessels improving the blood circulation, increases the oxygen, relieves pain and gives a feeling of relaxation and stress reduction.

The Tansun's Vitesse Infra Tan incorporates the features of the Tansun Vitesse with the addition of the infra-red technology. Get a desirable tan by enjoying the benefits of this sunbed, which is the next best thing to sunlight.

TANSUN VITESSE

Tansun Vitesse vertical sunbed is here to change the standards of the tanning industry and even exceed the most demanding customers' expectations. The Tansun Vitesse sunbed is the epitome of perfection and good taste and has been designed to offer unsurpassed tanning results, ultimate comfort and value for money.

You will find Tansun Vitesse in finest design and in two metallic and appealing colours, Burgundy and Royal Blue that suit all applications and aesthetic requirements. Tansun Vitesse's details and finishes are those aspects that differentiate it from any other ordinary tanning sunbed.

A high power ceiling fan offers exceptional cooling, ensuring optimum lamp performance and long lamp life.

At Tansun, safety and hygiene come first and that is why all of our sunbeds come with a self-illuminated exit sign and an easily accessible emergency cut-off switch.

Within a Tansun Vitesse sunbed, the whole tanning experience becomes even more unique with the ergonomically designed handles for maximum client comfort and stereo-speakers that enable your clients to tan and relax while listening to their favourite music.
