

MASSAGE

Tecnovita

by **BH**

Welcome to the future of **relax**

KNEADING. Circular massage, which effectively relaxes the entire back, strengthening muscles and relaxing stresses..

.....
TAPPING. A pleasant and delicate massage, which simulates the tapping of agile and expert hands along the entire back, helping improve the circulation of oxygen throughout the body.

.....
DUAL ACTION. The result of the combination of tapping or finger tapping massage with kneading. A function that increases the relaxing and beneficial effect of both types of massage.

.....
MUSICAL THERAPY. Combination of tapping and kneading with music. This function multiplies the relaxing effect of both types of massage.

.....
SWEDISH. The Swedish massage is the result of the pleasant combination of a delicate muscular massage and a slight tapping. Similar to the dual-action/wave/et massage but less energetic.

PUMMELING. Simulates running the knuckles over the entire back, causing a revitalising effect and favouring the circulation.

.....
SHIATSU. Simulates the finger of an expert masseur over the back, via strategic acupuncture points.

.....
HEAT. It provides a massage through heat application in specific areas, creating a pleasant relaxing sensation.

.....
VIBRATION. Vibration massage stimulates the muscles and relaxes them at the same time to eliminate fatigue.

.....
AIR. It offers a pleasant massage through air, with several benefits for blood circulation.
